TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03 - 30mm
Body Features	A to T
Stack Height	30 mm
Seal Plate Included (see notes)	No

NOTES

- Seal retainer plate is not required for this model.
- **Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Relief, A and B to T High Capacity

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03 - 30mm
Body Features	A and B to T
Stack Height	30 mm

NOTES

Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	On P, port 3 to T
Stack Height	44,5 mm
Seal Plate Included (see notes)	Yes

NOTES

- Stack height value in technical data table includes seal retainer plate.
- Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Sun's ISO 03 sandwich bodies are designed for multi-functional use to permit maximum circuit flexibility. Due to this versatility, the ISO 03 sandwich bodies do not have a counterbore for installing o-ring seals. Instead, Sun uses a special seal plate with a raised "NIB" and a locating "NOTCH". These bodies incorporate oversize, symmetrical mounting holes to allow the bodies to be rotated about the "NIB" axis and the longitudinal axis to achieve the desired functionality.

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	Flow into or out of workport A or B
Stack Height	44,5 mm
Seal Plate Included (see notes)	Yes

NOTES

- Stack height value in technical data table includes seal retainer plate.
- For check valve application, use only with CX*A check valves - free flow nose to side.
- **Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

TECHNICAL DATA

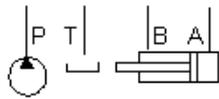

Body Type	Sandwich
Interface	ISO 03
Body Features	Reducer/reliever on B with reverse flow check and port 4 external
Stack Height	63 mm

NOTES

- Stack height value in technical data table includes seal retainer plate.
- This manifold has been designed with provisions to internally increase pilot flow to the "V" port. To do so, remove 340-001 plug and install 280-038-*** orifice.
- **Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Reducing/Relieving, On B tank to T with reverse flow check

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	On B with free flow check
Stack Height	50 mm
Seal Plate Included (see notes)	No

NOTES

Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03 - 40mm
Body Features	On P, port 3 to B
Seal Plate Included (see notes)	No

NOTES *Important:* Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03 - 40mm
Body Features	Cover manifold, reducer on P to A, tank to T

NOTES *Important:* Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

- /Y** 65-45-12 Ductile Iron, Viton, Chem. Black
- /Y3** 65-45-12 Ductile Iron, Viton, Trivalent Clear Zinc with Top Sealer

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03 - 50mm
Body Features	Bypass compensator

NOTES *Important:* Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

INCLUDED COMPONENTS

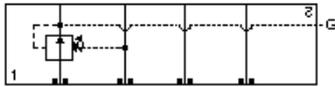

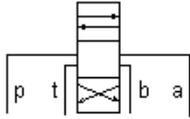

Part	Description	Quantity
500-001-012	O-Ring	4
811-001-006	Pin	1
850-004-156	Plug	2

CONFIGURATION OPTIONS

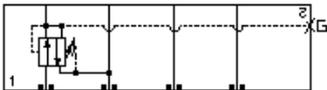

Model Code Example: ZTA

MODIFIER

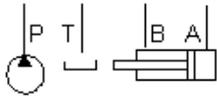

- 6061-T651 Aluminum, Buna-N
- /S* 65-45-12 Ductile Iron, Buna-N, Blackened
- /V* 6061-T651 Aluminum, Viton
- /Y* 65-45-12 Ductile Iron, Viton, Blackened

Reducing, On P, drain to T

Reducing/Relieving, On P tank to T

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	On P, port 3 to T
Stack Height	44,5 mm
Seal Plate Included (see notes)	Yes

NOTES

Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Circuit Saver, A and B, Tap in Manifold

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	Tap in manifold - A and B
Stack Height	25 mm
Seal Plate Included (see notes)	Yes

NOTES

- Stack height value in technical data table includes seal retainer plate.
- Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Circuit Saver, A and B, Tap in Manifold

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	Tap in manifold - A and B
Stack Height	25 mm
Seal Plate Included (see notes)	Yes
Mounting Hole Diameter	5,2 mm
Mounting Hole Depth	Through
Mounting Hole Quantity	4

NOTES

- Stack height value in technical data table includes seal retainer plate.
- Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

Circuit Saver, A and B, Tap in Manifold

TECHNICAL DATA

Body Type	Sandwich
Interface	ISO 03
Body Features	Tap in manifold - A and B
Stack Height	25 mm
Seal Plate Included (see notes)	Yes

NOTES

- Stack height value in technical data table includes seal retainer plate.
- Customer to install locating pin according to functional orientation required.
- **Important:** Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
