

# Mini hydraulic power unit type HR sizes 080 and 120

## Technical specifications

Type of device	Hydraulic power unit
Sizes	080, 120
Design	Reversing operation Operating mode S3 – 10 %
Pump type	Radial piston pump
pmax	210 bar
Qmax	0.52 lpm
Geometric displacement	
Max. motor power	0.3 kW
Motor type	12 V DC, 24 V DC 230 V AC, 400 V 3-phase current
Useable volume	0.23 l
Mounting position	Horizontal and vertical

## Features and benefits:

- Due to reversing operation, no further valves are required for reversing
- Very good price-performance ratio
- Holding function by check valves
